

Ready Made Factories

Project Scope:

JABEEN provides ready-made factories (Ready with services and utilities and ready for operation) with a variety of areas between 1,500 square meters and 2,800 square meters, for the small and medium enterprises. The ready-made factories are distinguished by providing production workshop, parking lots, loading and unloading area and administrative offices. They aim to localize conversion and light industries such as Films, coatings and thermoplastic engineering compounds. The ready-made factories also provide unique infrastructure including roads, water and energy networks, communications, sewage and rainwater drainage making it a great investment opportunity for entrepreneurs who are ready to start business with a very short lead time to market.

Added Value:

- Accelerate industries by establishing ready manufacturing factories by introducing Plug & play Concept
- Engage the private sector to invest in industry real estate
- Accelerate industries by establishing workshops
- Engage the private sector to respond for market supply and demand requirements.
