

PlasChem Park

Project Scope:

The PlasChem initiative aims to connect and cluster chemical industries while also developing an integrated value chain that will add significant value to the end product. PlasChem is promoting and developing dedicated park focused on chemicals and plastics industries in Saudi Arabia Al-Jubail, making the industrial integration a reality. PlasChem concept will contribute to local economic growth by maximizing the use of basic petrochemical products, promoting local content, encouraging new investment opportunities, lowering imports, and increasing the value of Saudi exports, in line with the Kingdom's Vision 2030.

PlasChem is situated in alJubail, with about 1,555 Ha being built in Jubail II, and is surrounded by major petrochemicals companies and consisting of two areas: primary and secondary industries and light and support industries

Added Value:

- Providing comprehensive management of the Plaschem area through unified services- preserving resources and facilitating their access to the investor
- Optimal utilization of basic petrochemical products and industrial integration
- Easy access to basic petrochemical products
- Ease of movement of exports and imports
- Reducing operational costs
- Creating new investment opportunities
- Increasing non-oil exports
